Luxury
In every curve...

WELCOME TO
THE WORLD OF

ARTEOR offers an inspiring breadth and depth of faucetry for bath and shower applications. ARTEOR faucets are designed, engineered and manufactured to the highest standards of quality and deliver a lifetime of uncompromised performance.

From sleek minimalist design to intricate traditional detailing, ARTEOR faucets let you define your style. And behind thoughtful design, you'll find cutting edge engineering.

ARTEOR produces all its products in-house under rigorous quality control and thus we are in a position of not being able to accept anything but the best quality and offer this as our minimum standard of production. The quality of the product is the result of rigorous monitoring of each step of the production process combined with the reliability of the raw materials used.

Inspired by art forms spanning centuries and cultures, drawn to elements of nature and motivated by ever-evolving technology, These influences serve as inspiration for bringing performance, design, innovation and art to life.

CUSTOMER INSTALLATION GUIDELINES

- To Ensure Uninterrupted Pressure Of Water, It Is Advisable To Keep The Pipelines Straight With Minimum Number Of Bends And All The Supply Lines Must Have Vent Pipes. These Vent Pipes Help In Removing Air-locking In The Water Supply To Give A Smooth Flow Of Water From The Fittings.
- Operating Water Pressure 1 Bar Is Required For All Type Of Diverters & Flush Valves And Showers And 25mm Pipeline Shall Be Used Rather Than 20mm Which Will Help In Overcoming Scaling Inside The Pipelines And Will Allow Sufficient Space For The Water To Flow.
- Prior To Plastering Or Fixing Tiles, Test The Working Of All The Installed Concealed Fitting On The High Pressure To Check For Leakage, If Any.
- Place The Outlet Point In The Overhead Tank At Least 25cm Above The Ground Level Of Tank. This Prevents The Flow Of Foreign Particles, Sand, Etc. Along With Water Supply Into The Fittings And Thereby Prevents The Possible Damage To The Working Parts. Clean The Tank Thoroughly Before The Supply Starts. It Is Suggested That The Overhead Tank Must Be Cleaned At Regular Intervals To Avoid Inflow Of Foreign Particles.
- To Protect The Fine Finish Of Fitting From The Dirt, Stains And Other Damages During Construction, Cover Them With Cloth Or Polythene After Their Installation, Till They Come Into Actual Use.
- Do Not Over Tighten The Faucet To The Wall / Wash Basin. Arteor Is Not Liable Or Shall Not Be Responsible For Any Such Damage Or For Improper Installation.
- Ensure Your Water TDS Level Is Below 300mg/ltr. You Can Install A Water Softener To Lower The Water Tds Level For Bathing Water.

CARE AND MAINTENANCE

DO'S

- Clean The Fitting Regularly With Soft Sponge Or Wet Cloth With Soapy Water To Remove Scaling Or Stains . Do Not Use Strong Detergents Or Abrasive Material Like A Bristle Brush Or Scouring Pad As This May Cause Damage To The Chromium Finish On All Arteor Products.
- Remove And Clean The Aerator Mesh From Time To Time To Increase Longevity And Clean The Dirt Sedimentation, Thus Avoiding Clogging. For Perfect Foam Flow Of Water, The Aerators Should Be Cleaned Regularly.
- Wipe Surface Clean And Rinse Completely With Water Immediately After Applying Cleaners.

DON'TS

- Do Not Allow Cleaners To Sit Or Soak On The Product.
- Cleaning Products Containing The Following Chemicals Can Cause This Bathing Product To Crack Or Discolor And Use Of Cleaning Products Containing These Chemicals Will Void This Warranty:

Naphtha • Amyl Acetate • Hydrogen Peroxide Solution (common Hydrogen Peroxide)
Toluene • Ethyl Acetate • Lye (common In Drain Cleaners) • Acetone
